The Company

ManaMed is a pioneer of designing, developing and distributing innovative medical devices. The company offers a wide range of orthopedic solutions for both physician and patient needs ranging from bracing to vascular therapy devices, assisted mobility devices, electrical stimulation, maternity, and DVT prevention products.

With extensive product and innovative offerings, ManaMed provides solutions to address the patient's continuum of care from performance and mobility to post-operative rehabilitation. For over seven years ManaMed has been creating products that help people get back on their feet after injury or surgery, enabling them to stay active longer.

ManaMed provides possible coding suggestions based on publicly-available information as a convenience to our customers. ManaMed products that have been assigned HCPCS codes by Medicare through the coding verification process. The assigned codes are the required billing codes for these particular products. For all other products, it is within the sole discretion of the customer to determine the appropriate billing code, as well as whether the use of a product complies with medical necessity standards and meets all documentation requirements of the payer. ManaMed accepts no responsibility whatsoever in this regard, nor does ManaMed make claims, promises or guarantees as to the availability of reimbursement for any ManaMed products.

ManaMed's focus is to drive better clinical outcomes with quality patient care and innovative medical devices.

"The relationships we build with our customers are the lifeblood of our company. Our success comes from our ability to understand and meet the needs of our customers. We are passionate about delivering products and services that make a difference in people's lives."

PlasmaFlow®

The PlasmaFlow is intended to be an easy to use sequential compression system, prescribed by a physician, for use in the home or clinical setting to help prevent the onset of DVT in patients by stimulating blood flow in the extremities (stimulating muscle contractions). This device can be used to aid in the prevention of DVT, enhance blood circulation, diminish post-operative pain and swelling, reduce wound healing time.

- Portable, lightweight and tubeless
- Long lasting re-chargeable battery. Up to 10 hours of use on one charge
- 2 Modes: Slow inflation and Step-Up Technology which allows the unit to increase pressure in slower increments
- 2 LCD screens to monitor usage and pressure

- Suggested HCPC E0676

PlasmaFlight®

PlasmaFlight has been approved by the FDA as an over-the-counter portable inflatable tube massage system which simulates kneading and stroking of tissue with the hands by use of inflatable pressure cuffs. This device can be used to:

- Temporarily increase blood circulation in the treated areas
- Temporarily relief of minor muscle aches and pains
- Electronically controlled pumps compress the calf or calves to aid in blood flow out of the lower extremities
- Pump will inflate each leg cuff to pre-set pressure of 55mmHG and deflate once that pressure is reached
- Visual display that shows up-to-the-hour timer, mode and pressure level
- Internal rechargeable battery and cordless design allows for ease of placement and patient mobility

- Suggested HCPC E0676
